

STEEL FABRICATION SOLUTIONS FOR UTILITY-SCALE SUBSTATIONS

INTEGRATED DESIGN, FABRICATION, AND DELIVERY- BUILT TO PERFORM

Gulf Island Fabrication, Inc. (GIFI) is a large-scale, custom metal fabricator with over 40-year history of delivering high-quality, on-time turnkey fabrication solutions

Located on a 175-acre site with direct waterfront access, GIFI offers end users the advantage of economies of scale, reducing overall project costs by eliminating third-party markups. Clients benefit from streamlined communication, cost transparency, and faster turnaround times.

GIFI's expansive, secure facility can store equipment and fabricated materials on-site, supporting phased delivery and just-in-time deployment strategies. With direct access to large ports, GIFI is fully equipped to handle freight and logistics operations worldwide, offering reliable transport solutions for even the most complex components.

KEY CAPABILITIES FOR UTILITY SUBSTATIONS

Structural Steel Fabrication

- Fabrication of bus supports, platforms, racks, & foundations to substation specifications
- Large-format capacity for custom assemblies with full QA/QC traceability

Modular Control Buildings & Skids

- Pre-assembled, plug-and-play units for rapid site deployment and energization
- Integrated electrical, mechanical & control systems under one roof

Electrical & Mechanical System Integration

- Certified Partnerships with Schneider Electric, Rockwell Automation & Siemens
- Delivery of fully integrated MCC panels, switchgear & enclosure systems

Pipe & Conduit Spool Fabrication

- Precision shop fabrication for consistent tolerances and simplified field tie-ins
- In-house welding, fitting & inspection for every project stage

Pre-Coating & Painting Services

- Surface prep, coating & paint systems engineered for outdoor durability
- ASME-certified welding and inspection with full QA/QC documentation

Turnkey Project Delivery

- Engineering, design, fabrication & project management from one provider
- Streamlined schedules, reduced field labor & improved cost transparency

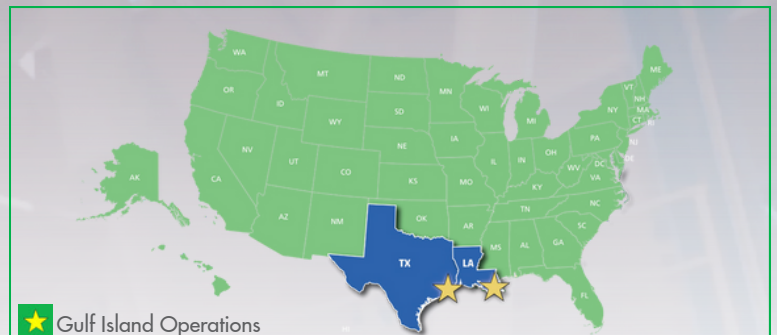

A Gulf Island Company

- Design and Engineering Services
- System Integration
- Project and Program Management
- Vertically Integrated Automation

CERTIFICATIONS

- ASME U/U2/R Stamp
- Schneider Electric Certified System Integrator
- Rockwell Automation Certified System Integrator
- Siemens Solution Partner
- Project Management Institute Certification

★ Gulf Island Operations

WHY UTILITIES CHOOSE GULF ISLAND FABRICATION?

- **Proven Track Record:** Delivered 200+ remote instrument enclosures and control rooms & 50+ power distribution centers domestically
- **Rapid Deployment:** Offsite fabrication and pre-assembly reduce field installation time
- **Integrated Systems:** Certified automation and controls integration ensures reliable operation
- **Large-Scale Capacity:** Secure facility and skilled workforce to handle complex, multi-project schedules

PAST MODULE PROJECTS

CB&I - Axiall Lotte Ethylene Cracker Modules
– STLE Pipe Rack Module –
Three Heater Modules | Lummus Technology

ML- 2 Project- Artemis Program- NASA – Fabricating structural components
| Kennedy Space Center

Bechtel Compression Module
– 1,000 Ton Compression Module | 6 Month Fabrication Duration

200+ Remote Instrument Enclosures & Control Rooms Delivered Worldwide

50+ Power Distribution Centers Delivered Domestically

100s of Process and CEMS Analyzer Shelters Delivered Worldwide
